Work Experience

Okapi Partners

Investor Relations Analyst;

Remote

April 2025 – October 2025

- **Data Entry, Reporting & Records Management:** Logged shareholder outreach in Microsoft Access with record-consistency checks, producing campaign tracking summaries, reports, and messaging recommendations for supervisors.
- **Process Improvement & Collaboration:** Refined outreach scripts and messaging with supervisors via feedback loops, as well as improved database logging consistencies pertaining to shareholder information.
- **Client Education & Stakeholder Support:** Conducted 25+ calls and support sessions per hour with shareholders and stakeholders, explaining corporate actions, financial terms, voting options, and strategic campaign details related to Okapi's advisory work with corporations, hedge funds, mutual funds, and private equity sponsors.

JetBlue Airways Corporation

Inflight Crew Trainee;

New York, New York

Sept 2023 – Nov 2024

- **Fly-Fi Network Connectivity & Customer Satisfaction:** Troubleshoot Fly-Fi connectivity issues across 500+ flights, helping improve customer satisfaction survey results by 34% through step-by-step support for captive portal redirects, browser cache/cookie issues, VPN interference, Apple auto-join settings, Wi-Fi configuration, login checks, and device connectivity.

All Covered Inc.

IT Support Specialist;

New York, New York

January 2021 - June 2021

- **On-Site, Client-Facing Field Support:** Provided Tier 1 support on-site across 12 Brooklyn polling sites, supporting poll workers on automated voter check-in and ballot-on-demand printing systems
- **Device Deployment & Configuration:** Deployed 16+ iPads per site across check-in, PollPrint, and affidavit stations, verifying app/iOS versions and config profiles, downloading ballot files, and pairing pads to OKI printers via peer-to-peer
- **Connectivity, Maintenance & Escalation:** Validated Wi-Fi and cloud connectivity, ran test ballot prints, monitored printer toner and paper levels, performed nightly device syncs and reboots, and escalated hardware swaps to vendor management through the support hotline

NYIT Academic Technology Department

IT Support Assistant

New York, New York

August 2019 - January 2021

- **Okta, Identity & Escalation Support:** Resolved student & faculty SSO and license/access issues across Handshake, Google Workspace, and Outlook, documenting symptoms and troubleshooting steps for accurate Tier 2 escalation to NYIT IT
- **A/V & Zoom Rooms Configuration:** Operated Zoom-enhanced smart classrooms with touch-panel A/V control, projectors & large displays, document cameras, and sound-balanced speaker/microphone systems
- **Esports Lab Buildout & Hardware Deployment:** Led the NYIT CYBEARs esports room buildout by selecting cost-effective components for 10 gaming workstations, physically building each station, and documenting purchased hardware, peripherals, and setup details for future maintenance.
- **Asset Management & Technical Support Ownership:** Maintained inventory for 10 mice, 10 keyboards, and workstation components, created a basic knowledge base, and served as the primary point of contact for room-related issues involving networking, PC troubleshooting, login credentials, and hardware improvements.

Projects

Azure Active Directory Deployment & Administration project - [Project Link](#)

May 2026 – Present

- Deployed a 2-VM Active Directory environment in Microsoft Azure (Windows Server 2025 domain controller, Windows 10 client) on a private virtual network, assigning a static private IP and routing client DNS through the DC
- Resolved account admin issues (lockouts, disabled accounts) under a Group Policy lockdown policy, verifying through event viewer
- Bulk-provisioned 13 employee accounts across 6 department OUs and 6 security groups through PowerShell
- Secured department file shares with NTFS permissions, and documented every phase in video walkthroughs with a topology diagram & Resolved account administration issue (lockouts, disabled accounts) under a Group Policy lockdown policy

Airline Customer Satisfaction Analysis - [Project Link](#)

November 2024 – March 2025

- Utilized Python (Pandas, NumPy), SQL & Excel to organize data for clear insights of customer satisfaction.
- Built and tuned logistic regression and decision tree models to analyze large survey datasets and free-text inputs with 78.6% prediction accuracy.
- Developed dashboards and visual reports to track KPIs across customer segments utilizing Tableau and Excel Power Query, & highlighting actionable insights for executive decision-making

Education

New York Institute of Technology

New York, NY

Bachelor of Science | Computer Science | GPA: 3.4 Cum Laude

August 2019 - May 2022
